Re: NSW Health Pathology Senior Leadership – ICT Structure Reviews

Dear Mr Hayes

Further to my correspondence dated 26 April 2023, I am writing to update you with progress on the review of our senior leadership structure for the ICT portfolio.

We have commenced recruitment for our new Associate Director, Clinical ICT Operations, which will lead the transformation of our ICT clinical operations as we prepare for Fusion and implement the structural changes required to better meet the needs of our internal and external stakeholders and customers across the state now and into the future.

Once the Associate Director, Clinical ICT Operation has been recruited, the successful candidate will help lead recruitment for the new roles in Clinical ICT Operations including:

- Clinical Product Lead
- Manager, Core LIMS
- Manager, Test and Release
- Manager, Statewide Training
- Manager, Operational Engagement

In addition, there will be two new roles, Associate Director, ICT Governance and a ICT Category Manager, to improve governance over pipeline of projects with an ICT component and/or direct ICT requests aligned to ICT and organisational priorities and address increasing demand for ICT category management including contract preparation, commercial negotiations and contract management.

We will continue to provide updates as the ICT restructure continues. Please feel free to reach out with any questions or feedback at deanna.paulin@health.nsw.gov.au or if you would like to discuss this in more detail.

Yours sincerely

Dr Deanna Paulin
