Dear Mr Hayes

Fetal Medicine Unit – Model of Care

The Division of Women Youth and Children Fetal Medicine Unit (FMU) has recently developed a draft Model of Care (MoC). The MoC clearly defines and articulates how services are delivered and helps ensure that all health professionals are ‘viewing the same picture’, working towards common goals and most importantly evaluating performance on an agreed basis. FMU Staff has been engaged in the development of this MoC.

The MoC is a dynamic document and will be updated over time to support new evidence and improved ways of working. Any updates will include relevant change management principles and processes to ensure clear engagement and communication.

This MoC will be stored on the Canberra Health Services (CHS) ‘Models of Care’ intranet site. It will be reviewed and updated regularly through consultation and the relevant communication.

The consultation period for the proposed FMU MoC will be for 14 days commencing from Friday 1 September and will run until COB Friday 15 September 2023. Please email any comments on the MoC to: chs.wyexecutiveoffice@act.gov.au with the subject heading of: *Fetal Medicine Unit - MoC*

Kind regards

Suzanne Pilkington
Acting Executive Director
Division of Women Youth and Children
