

Update: Draft Roster Consultation, HealthShare Armidale Hospital

Dear Member,

Following from the HSU's prior [newsletter 673/2018](#), your Site Supervisor has forwarded the below correspondence regarding the previously supplied new draft roster for Patient Support Services.

HealthShare advises that your Site Supervisor has recently updated the roster to take into account the new shifts, and also to reflect that some staff have expressed interest in reducing their hours. The roster has been presented to staff on site, in addition to forms for current permanent staff to express interest in the full-time cleaning and full-time wardsperson vacant positions.

The Site Supervisor has offered her apologies and has explained that the previous draft roster sent to the HSU was an older version and was sent in error. The attached version was distributed to the staff. The information previously provided on shift times is still correct.

There has also been one other adjustment since distributing to the staff, which was to make the 2 full-time lines in ED have the same number of late shifts as each other (on the initial version one line had 8 late shifts and one had 10 late shifts, whereas on this version they both have 9 late shifts). This was due to a request by one of the current ED cleaners.

Below is a key for the shift codes for the attached draft roster:
